Professional Summary

Motivated 4th-year B.Tech (IT) student with hands-on internship experience in Machine Learning, Deep Learning, NLP, LLMs, LangChain and Cybersecurity. Proven ability to build and deploy end-to-end ML systems using Python, TensorFlow and Streamlit. Seeking a corporate internship to contribute AI/ML solutions to real-world business problems and deliver measurable impact.

Technical Skills

Languages: Python, C/C++, Java, HTML5, CSS3

ML / Deep Learning: Scikit-learn, TensorFlow, Keras, NLP, CNN, RNN, LSTM, Transformers (mBART)

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering

Deployment & Web: Streamlit, Flask, Hugging Face, FAST APIs

DevOps & Tools: Git, GitHub, Docker, VS Code, Google Colab

Security: Kali Linux, Metasploit, Meterpreter, Penetration Testing

Databases & OS: MongoDB, MySQL (basic), Windows, Linux (Ubuntu, Kali)

Internship Experience

Machine Learning Intern — PharmSight Research and Analytics

June 2025 – July 2025

Remote

- Performed feature engineering (FE) and exploratory data analysis (EDA) on healthcare datasets using Python, Pandas, and NumPy.
- Implemented and benchmarked supervised and unsupervised ML algorithms (SVM, KMeans, Random Forest) for clinical predictions.
- Built and deployed a Multiple Disease Prediction System using SVM as a Streamlit web app, enabling real-time user access.
- Improved understanding of model optimization, deployment pipelines, and healthcare data compliance.

Research Intern — Cybersecurity — MNIT Jaipur

June 2025 – July 2025

Jaipur, India

- Conducted reverse engineering and exploit analysis in a professional cybersecurity research environment.
- Studied and reproduced real-world Metasploit exploits including EternalBlue (MS17-010), VSFTPD v2.3.4 backdoor, and Samba Username Map Script in controlled lab settings.
- Gained hands-on penetration testing experience with Kali Linux, Metasploit Framework, and Meterpreter shell.
- Documented findings on payload execution techniques and defense mechanisms, contributing to lab research reports.

Projects

EcoPilot AI – AI-Powered Carbon Footprint Platform — [GitHub](#) — [Live Demo](#)

Python, FastAPI, Next.js, TypeScript, MongoDB, Gemini 2.5 Flash, Tailwind CSS

- Built a full-stack AI platform to track carbon emissions, analyze utility bills, and provide sustainability insights.
- Used Gemini 2.5 Flash for AI chat, bill OCR analysis, and room image analysis.
- Implemented secure user authentication using JWT, Bcrypt, and MongoDB Atlas with protected REST APIs and persistent chat history.
- Deployed the application using Vercel (Frontend) and Render (Backend) with a responsive UI and scalable FastAPI architecture.

Multi-Language Translator — [GitHub](#) — [Live Demo](#)

Python, mBART, LSTM Seq2Seq, Hugging Face, Flask, Streamlit

- Fine-tuned Facebook's mBART (transformer) model for domain-specific translation with a custom LSTM Seq2Seq fallback for flexible language support.
- Implemented transfer learning pipeline using pre-trained weights, reducing training overhead significantly.
- Deployed dual-interface web apps (Flask + Streamlit) with live Hugging Face model integration for seamless end-user access.

Face Mask Recognition System — [GitHub](#) — [Live Demo](#)

Python, TensorFlow, Keras, CNN, OpenCV, Streamlit, Flask

- Built a CNN-based real-time face mask detector supporting single images, group photos, and live webcam inference using OpenCV.
- Deployed as both a Flask API and Streamlit web app for broad accessibility across environments.

Education

B.Tech in Information Technology

2023 – 2027 (Expected)

Rajasthan Technical University, Kota

CGPA: 7.6 / 10.0

Certifications & Achievements

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp – Udemy [Certificate](#)
- Industrial Training in Cybersecurity – MNIT Jaipur [Certificate](#)
- Industrial Training in AI/ML – PharmSight Research and Analytics [Certificate](#)
- Top 35** – National CyberShield Hackathon organized by Madhya Pradesh Police [Certificate](#)
- Top 5** – Arjuna 2.0 organized by NIT Agartala [Certificate](#)
- 6x National Hackathon Finalist** – TechJam 2.0 (Code Rangers × Microsoft), Arjuna 2.0 (NIT Agartala), National CyberShield Hackathon (Madhya Pradesh Police), Electrathon 8.0 (NIT Hamirpur) and others [Certificate](#)
